- To harvest the crop within 2 weeks of being notified that crop is ready in accordance with instructions provided on site at time of picking. If crop cannot be harvested, alternative arrangements can be made to secure your delicious cherries. If no arrangement can be made, the crop will be picked and / or destroyed to preserve the integrity of the orchard against agricultural pests.

WE - "The Cherry Tree Caretaker" – CCOrchards will provide:

- Pruning & tree limb training / spreading
- Regular grass cutting, mulching and sucker management
- Pollination
- Irrigation & Fertilization
- Pest and Weed control
- Thinning as required
- Harvest ready certification via Ripe-N-Ready e-mail Harvest Report

A few other points:

- You don't own the tree – You just get the crop from it (whatever that may be) for the season you reserve.
 - Mother nature will ultimately determine what the tree will produce
 - We guarantee you'll get a minimum crop of cherries or you'll get another chance at it next year free of charge.
 - Pricing is for a single growing season only and subject to change at time of renewal.
- You can come out and visit the tree before harvest, but you'll have to make an appointment as you won't be able to gain access to the property without an attendant.
- We are obligated to pick the cherries from your tree (one way or another)!
 - If you can't make it out, we can pick the tree for you and send you the harvest. We'll talk about what that will cost once we know how much is on the tree. Remember, that time is of the essence with perishable produce so you'll have to let us know very quickly.
- Payment is by Cash or Cheque.
